# Who We Are

People First Party is a political institution as well as a people-focused movement that carries the voices and aspirations of Papua New Guineans. We offer citizens meaningful and realistic choices and opportunities for political participation in Papua New Guinea.

We are passionately driven by our shared-vision of making Papua New Guinea and her people economically independent as envisioned by our forefathers.

People First Party was founded in 2001 by former Governor for Morobe Songang Luther Wenge and Secretary General Peter Honale. When Luther Wenge lost the Morobe Governorship in the 2012 National Elections, the Party remained dormant for 9 years until February 2021 when it appointed the Member for Yangoru Saussia, Hon. Richard Maru, as its Parliamentary Party Leader.

Under the leadership of Maru, People First Party has been rebranded with a new shared-vision and membership from right across PNG. The Party is being built into a national institution and upon the dreams of foundations of our forefathers and the efforts of our past and present leaders.

People First Party is a registered political party under Papua New Guinea's Organic Law on the Integrity of Political Parties and Candidates. It is also an incorporated association under the Associations Incorporation Act administered by the Investment Promotion Authority.

# Our Core Values

Our core value is God First. That means putting God's People First. Our people and their well-being, aspirations and their future are at the centre of our development agenda.

We are nationalistic and patriotic.

We live by the principles of equity and fairness.

We provide selfless service to people and country.

We provide visionary, decisive and "action" leadership to make our shared-vision a reality.

We are innovative and creative.

We promote as well as live by the key governance principles of integrity, transparency and accountability.

We abide by the rule of law.

# Party Leader: Hon. Richard Maru, MP

Hon. Richard Maru, BTech, MBA, OBE, is a visionary, nationalistic and development-oriented political leader and Member for Yangoru-Saussia District in East Sepik Province.

In his first Parliamentary term (2012 – 2017), he served as the Minister for Commerce, Trade & Industry. He put in place PNG's first ever Trade Policy to enhance international trade and make PNG a competitive foreign investment destination. He led the Small to Medium Enterprise (SMEs) movement, laying the foundation for MSME growth through the SME Policy, credit guarantee corporation and reserve business list legislations.

Some notable achievements includes allocating funds for non-existent cancer facilities in Port Moresby and Lae and the establishment of PNG's first ever commercial dairy farm through public-private partnerships so PNG can replace K400 Million per year dairy import. The District School of Excellence concept is his brainchild, a strategy aimed at improving quality of education in rural PNG and getting more students into STEM [Science, Technology, Engineering, Mathematics].

Prior to politics, Hon Maru was a corporate executive, being the Managing Director of the National Development Bank [NDB]. He resurrected the insolvent Agriculture Bank of PNG, rebranded to NDB and turned it around to growth and profitability in under 8 years.

He was also a senior business executive, having worked in Papua New Guinea and Australia in various capacities as senior manager, director and chairman of the board of directors across varied industries. He was awarded Officer of the Most Excellent Order of the British Empire (OBE) Member in 2011 in recognition for his services in development finance.

Hon Maru holds a Bachelor of Technology in Business Studies degree from the PNG University of Technology and a Master of Business Administration (MBA) from the University of Bath, United Kingdom. He is an Honorary Fellow – Institute of Banking and Business Management (IBBM).

Under his “action” leadership the Yangoru Saussia District has been transformed from an under-developed rural District to a modern service centre and agricultural economic hub in just under 10 years. That is the blueprint of making People First Party's vision a reality.

From 2012 to 2020, Hon. Maru was a member of the People's National Congress Party. He resigned in January 2021 and became the leader of People First Party.

# Party Executives

**Dominic Krasombi**

PRESIDENT

Dominic is a well-respected community leader and SME owner based in Lae City. He was leader of a youth movement advocating for the plight of urban youth when he became involved in Morobe politics since 1997 with his association with then Governor and Party co-founder Luther Wenge.

**William Lamur**

STRATEGIC ADVISER & TREASURER

William Lamur, OBE, is a very senior Papua New Guinean business executive, having worked with a number of major enterprises in Papua New Guinea, Australia and Solomon Islands for over 40 years. Mr Lamur served in various capacities as manager, chief executive office, managing director, director and chairman across varied industries

**Kessy Sawang**

POLICY ADVISER

Ms Sawang is an economic policy adviser and has over 20 years tax/revenue policy and administrator experiences, as former Director at IRC, Deputy Commissioner of PNG Customs and Head of Tax Review at Department of Treasury. She is an advocator for women in Parliament.

**Peter Honale**

CO-FOUNDER & SECRETARY GENERAL

Mr Peter Honale LM, OL is the co-founder of the Party and has been the Secretary General of the Party since its inception in 2000. He has been an active player in Papua New Guinea's business and political spheres for over 30 years, with business establishments in Papua New Guinea, Fiji and Cairns (Australia).

# Our Shared-Vision

**"To Secure Papua New Guinea's Economic Independence by 2032"**

Papua New Guinea gained political independence in 1975 upon the aspirations of our founding fathers as stated in our National Constitution or "Mama Law", with five (5) National Goals and Directive Principles in the Preamble – integral human development; equality and participation; national sovereignty and self-reliance; wise use of natural resources and the environment; and Papua New Guineans ways.

The third goal states:

*"We declare our third goal to be for Papua New Guinea to be politically and economically independent, and our economy basically self-reliant"*

People First Party [PFP] shares this vision of an economically independent and self-reliant Papua New Guinea, at both individual and national level.

Today, PNG's political and socio-economic development indicators tell the story that despite the 46 years of political independence, 40% of Papua New Guineans still live in poverty. The extraction and development of the country's rich natural endowments has not translated into economic self-sufficiency and a high quality of life for all citizens. PNG increasingly finds itself without the internal revenue and fiscal capacity to fund basic services for its rapidly-increasing population.

## VISION

---

Recently, the Covid19 pandemic exposed PNG's existing weak healthcare system that was unable to cope with the impacts of the pandemic, causing thousands of preventable deaths. Forty percent [40%] of Papua New Guineans already living below the poverty line were forced deeper into poverty, and unemployment and fiscal debt skyrocketed. These challenges amplified the voices of Papua New Guineans who want greater economic security and opportunities – for themselves and their country.

It is during this unprecedented time of crisis, disruption and uncertainty that the People First Party has been re-established to provide the vision, leadership and a policy roadmap for a better future. Our people's voices ignited the vision of our founding fathers to have economic independence. Thus, our National Goals and Directive Principles are the foundation of our Party's vision and key policy platforms.

We hope this vision mobilizes the hearts and minds of Papua New Guineans to rethink our path to recovery. People First Party will provide visionary, nationalistic, decisive and strong development-oriented political leadership.

Our post-Covid19 innovative policies and strategies aim to make our shared-vision of making Papua New Guineans and their country economically independent by 2032 a reality.

Together, we can, through partnerships and shared-responsibility.

A local transport SME loading cocoa bags, East Yangoru

# Our Natural Resource Endowments

Papua New Guinea is one of the most resource-rich countries in the world, with the following world rankings:

- 11th largest producer of liquified natural gas [LNG];
- 20th biggest gold producer;
- 18th biggest coffee producer;
- 12th biggest cocoa producer;
- 7th largest palm oil producer;
- 5th largest vanilla producer;
- 2nd biggest round logs exporter;
- Exclusive economic zone of 2.4 million square kilometers is the most productive in the Pacific with 10% of world tuna caught in PNGEEZ;
- World's 3rd largest rainforest after the Amazon and Congo;
- Tropical wilderness that contains 5% of world's biodiversity in less than 1% of the world's total land area;
- Diverse tangible and intangible unmonetized cultural assets.

Our Party policies addresses the question of why we are so rich yet remain poor after 46 years of political independence, and how we can become economically independent.

The recent Covid19 pandemic's disruption has also opened new doors of opportunities for our political party to prioritize policies that are people-focused and that which enhances resilience and sustainability of our economy to shocks.

Cocoa Nursery at Huaripmo, Sepik Plains, Yangoru Saussia District

# Key Themes or Pillars of our Policies

The People First Party's key policy platforms are aligned to three (3) overarching themes or pillars:

1. Sustainable Economic Growth & Shared-Prosperity;
2. Human Development & Human Security; and
3. Governance & Institutions, Leadership & Partnerships [GILP].

Our sustainable economic growth and shared-prosperity theme's overarching goal is to generate sufficient internal revenue by improving inefficiencies and growing tax revenue in proportion to population growth.

We will diversify our economy into sustainable sectors and eradicate poverty and inequality by focusing our development efforts at 40% of our people living below the poverty line, and on 85% of our marginalized rural citizens.

Our human development and human security theme aligns to our National Goal and Directive Principle No. 1 - *Integral Human Development*. Our policies in this pillar entails our social investments in health, education, food security, decent employment, access to clean and safe water and sanitation, and modern housing [urban and rural]. We will improve law & order to make our communities safe and secure for all.

We will ensure better public governance through our "zero corruption" policy and build strong independent institutions. We will strengthen our local and global partnerships and cooperation so we build our economies and lives better together. PFP will provide visionary, nationalistic, God-fearing and strong development-oriented leadership.

# Key Policy Platforms

Our 11 core policy platforms are:

1. Revenue generation;
2. Zero corruption;
3. Free & quality education and skills development for all;
4. Free & quality healthcare that is accessible by all;
5. Food import replacement and downstream processing of natural resources;
6. Equitable distribution of enabling infrastructures prioritized based on socio-economic merits and digital connectivity;
7. Rural districts transformation and service centres;
8. Income generation, wealth creation and mass employment of citizens;
9. Empower youth, women and children and churches;
10. Secure and sustainable communities, protection of natural environment and disaster preparedness;
11. Governance and institutions, partnerships and leadership [GILP];

# 1. Revenue Generation

Revenue Generation is our overarching core policy platform that supports our vision of economic independence. Resource-rich Papua New Guinea must sustainably generate sufficient internal revenue so it can be self-sufficient in funding its development agenda.

The number one [No.1] priority of People First Party is to raise PNG's internal revenue from the current K15 Billion per year to K100 Billion per year by 2032.

Revenue is PNG's biggest need. We continue to borrow and mortgage the future of our children in debt because we have failed to grow the 'revenue pie' whilst population growth has outpaced our development efforts.

Our primary goal of revenue generation will be achieved through:

1. Agriculture, downstream processing and import replacement as the engine for sustainable growth and employment;
2. Reform state-owned entities [SOEs] to reduce cost of doing business, and ensure SOEs are recapitalized outside of Government's budget;
3. Reform revenue policies and administration, establish revenue administration board to maximize revenue collection and protect revenue losses;
4. Introduce new legislation that will change the current laws in the mining and petroleum sector to achieve the following:

## OUR POLICIES

---

- Better economic rents for our mining and petroleum resources;
  - PNG will no longer have to borrow to pay for equity in mining and petroleum projects but given free carry or free equity in all future projects, similar to countries like Malaysia [production-sharing scheme];
  - All income from mining and petroleum companies are brought back first to PNG, and not kept offshore;
  - Review and remove all fiscal incentives for the mining and petroleum sector that results in loss of revenue for PNG. The same will apply to other resource sectors like Fisheries, Forestry, etc;
  - Operationalize the Sovereign Wealth Fund.
5. In Agriculture, we will offer the most attractive set of fiscal incentives to attract new large scale investors into the sector as part of our import substitution policy, and grow our exports.
6. We will also undertake land reforms to free up more customary land for large-scale agriculture projects in partnership with landowners under win- win partnerships;
7. We will also impost new export taxes on raw materials and semi-processed raw materials like cocoa beans to encourage downstream processing into final products like chocolates;
8. Establish a price stabilization fund.

Coffee - the backbone of Highlands economy by Kalakai Photography via Facebook]

## **2. Zero Corruption**

According to Transparency International's 2020 Corruption Perception Index [CPI], Papua New Guinea ranked 142 out of 180 countries, with a score of 27 out of 100 that classified it as a "highly corrupt" country.

People First Party will ensure PNG's CPI is improved through better public governance at both the national and sub-national levels of government.

PFPP will build strong institutions and provide better public governance to eradicate the corrosive culture of corruption - which is the abuse of public power for private gain.

We will institutionalize our efforts to eradicate corruption through policies such as ICAC, Unexplained Wealth Legislation, Whistle Blowers Act, and their effective enforcement. We will invest in Information & Communication Technology [ICT] and digital systems to improve governance and fight corruption, with particular focus on how government contracts are procured, projects implemented and monitored.

There is zero tolerance for corruption with People First Party.

## 4. Free and Quality Healthcare that is Accessible by All

PFP envisions that by 2032, Papua New Guinea will have a world-class healthcare system that is managed by highly qualified healthcare professionals and is accessible by all our people as well as the people of the Pacific, and also contribute significantly as a revenue-earning industry, through health related tourism.

Our goal is to reverse Papua New Guinean's current worst health indicators by ensuring our people enjoy their fundamental right to primary healthcare for free.

We will:

1. Establish Level 4 District Hospitals in every district;
2. Build regional hospital in New Guinea Islands;
3. Build two Level 7 super specialist hospitals in Port Moresby and Lae for secondary healthcare needs like cancers, kidney and heart diseases and eye care;
4. Increase health professionals manpower;
5. Provide health determinants like safe water and sanitation and decent income so people can access good nutrition to eradicate child malnutrition and improve health and well-being;
6. Improve maternal and infant mortality.

## **5. Food Import Replacement and Downstream Processing**

We will implement strong import substitution development policy that aims to replace import of food which can be produced locally. We will work our land [agriculture], feed ourselves, and stop the wealth transfer and the robbery of employment and income. Thereby lift our people out of poverty, grow our economic base and increase government revenue.

PFPP declares war on all food imports and will offer incentives to attract investments in agriculture, food manufacturing and downstream-processing of our natural resources.

We will:

1. Replace imports of food like rice, dairy, chicken, pork, fruits and vegetables, beef, canned fish, potato chips, processed coffee, etc;
2. Downstream process cocoa into by-products;
3. Establish the PMIZ in Madang, process all fish caught in PNG waters locally, create 40,000 new jobs and increase fisheries revenue from current K500 Million to K2 Billion per year;
4. Stop the export of round logs by 2025 and downstream process;
5. Establish a rice institution that will partner with the private sector to develop the local rice industry;
6. Build industrial parks and free trade zones.
7. Establish free trade agreement with Indonesia;
8. Establish PNG Embassy in Jerusalem, Israel, and build partnerships for technology.

Locally-produced milk by Ilimo Dairy Farm

# 6. Equitable Distribution of Quality Infrastructure and Digital Connectivity

Infrastructure is the catalyst for economic growth and poverty reduction. We will ensure that climate-resilient and quality physical infrastructure investment is distributed equitably to all parts of the country, prioritized based on social and economic merits.

Our policy includes a national program of investments in:

- Transportation infrastructure network consisting of roads, bridges, jetties, airports, airstrips, and wharves, with a focus on missing links;
- Digital infrastructure, connectivity and ICT;
- Clean, sustainable and affordable energy;
- Water, Sanitation and Hygiene [WaSH]

We will:

1. Establish an energy fund and invest in our natural energy resources - hydro, natural gas and solar - to provide clean, cheaper and reliable electricity to 80% of our population by 2032;
2. Utilize the Coral Sea Submarine Cable project to make ICT services cheaper and widely accessible;
3. Build on and support the current "Connect PNG" Program;
4. Build international wharfs in Wewak and Vanimo to open up trade with Asia.
5. Establish the National Water, Sanitation and Hygiene Authority and adopt legislation to regulate the sector;
6. Deliver the Purari Hydro Electricity.

Tambul-Mendi backroad by Kalakai Photography via Facebook

## 7. Rural Districts Transformation and Service Centres

The creation of District Development Authorities in 2014 makes Districts unique territories and provides a new paradigm opportunity for partnerships for revitalizing district service delivery, self-reliance and the transformation of our rural District for growth and economic development. We focus on rural districts because 85% of our people live there.

PFP will develop Districts as service centres and economic growth hubs, enabling people to access services and do business in their own Districts. We will make Districts attractive to attract quality public servants, as well as private sector investors, create rural employment and reduce urban migration.

We will:

1. Build Level 4 Hospitals in every District;
2. Build District Education Excellence System and institutions for skills development;
3. Implement our District Towns Improvement Program, starting with the less well-off rural Districts;
4. Strengthen the capacity of District Development Authorities and local-level governments;
5. Empower Districts with enablers like quality infrastructures and partnerships for economic growth through agriculture;
6. Strengthen Law & Justice for safe and secure Districts.

Solar cocoa dryer for premium quality and downstream cocoa processing, Sepik Plains, Yangoru Saussia District

# 8. Income Generation, Wealth Creation and Mass Employment

For a decade since 2013, right after the construction of the PNG LNG project, PNG has been gripped by unemployment crisis that did not improve until it got worse with the Covid19 pandemic. Tens of thousands of job losses and lock-down restrictions on the informal sector pushed families into poverty. This has also opened the window of opportunity for us to rethink the way forward for our people to have financial security and be economically self-reliant.

We will:

1. Grow the citizen SME Sector by introducing the 'Reserve Business List' legislation and operationalize the Credit Guarantee Corporation. Our target is to have 500,000 citizen MSMEs by 2032;
2. Grow the K12 Billion per year informal economy that feeds 95% of our people, through investments in market, water, electricity, roads and digital infrastructure in all Districts;
3. Partnerships and collaborations with the private sector for high-impact innovative transformation of agriculture and rural economy, thus creating rural employment and markets;
4. Food manufacturing and downstream processing should create jobs, increase income and thereby reduce poverty, improved food security and nutrition for families.
5. Investment in non-resource agriculture and fisheries sector to create a future that relies less on the cyclical extractive industry, and provide equitable economic opportunities to all our people.

Smallholder family rice farming, Sepik Plains, Yangoru Saussia District

## 9. Empower Youth, Women and Churches

Empowered youth and women can become key agents for change and development, enhance economic security of families and promote peace in our societies. Our core policies therefore places youth and women at the center of our development agenda.

PNG's high population growth is driving a rapid increase in the proportion of young people, with 60% [5.4 million youth] between the ages of 15 and 25. PNG's youth bulge is a ticking time bomb threatening our society. PFP will seize the opportunity to harness this demographic capital with our policies that will prevent marginalization and disillusionment. We will give voice to our youth.

PFP's policies are pro-women. We will eradicate the slavery of women carting water daily, invest in infrastructure for the informal economy and support women in the MSME sector. Women will be involved in decision-making and leadership roles. We will eradicate poverty through education, better health and economic empowerment of women.

PFP will empower and partner with Churches and Faith-Based Organizations to implement our key policies. Churches play a critical role in development, and step in where Government services cannot reach the people.

Women from Nakanai, West New Britain, joining our #PeopleFirst movement

## 10. Secure & Sustainable Communities, Natural Environment and Disaster Preparedness

To enable our people to live secure and peaceful lives, and for businesses to thrive, PFP will invest in strengthening the work of the Law & Justice Sector, the work of churches and civil society in endangering peace and harmony and in empowering communities to do more in civic duties, empower youth and women into self-reliance work. We will address the critical problems of violence, crime and conflicts that binds our people in fear and displace thousands from their homes by investing in the Police Force.

PFP will ensure that PNG's natural resources and environment are conserved and used for the collective benefit of all, and be replenished for the benefit of future generations. We will establish a climate fund that addresses the impact of climate change on the environment, as well as environment degradation by unsustainable human practices.

The Covid19 pandemic exposed PNG's disaster unpreparedness. PNG is also prone to the effects of climate change, natural disasters, biosecurity and thousands of people displaced from their villages and have become "internally displaced" by natural disaster. We will establish biosecurity policy and legislation and policy on climate refugees and internally displaced people.

# 11. Governance & Institutions, Leadership and Partnerships

PFP will promote good governance and strengthen institutions to earn the people's trust in their government and political systems, and effectively implement our policies. PFP will build strong institutions and provide better public governance to eradicate the corrosive culture of corruption - which is the abuse of public power for private gain.

We will know good governance by its fruit - when development outcomes are achieved with adherence to key principles and values of compassion, voice, accountability, fairness, legitimacy and rule of law.

The impact of Covid19 has made inclusive partnerships and co-operation more critical in a globalized interdependent world, Our motto "*together, we can*" is about partnerships and collaborations so we build better together as we put people at the center of economic recovery and work towards achieving our shared-vision and the Sustainable Development Goals.

People First Party will provide visionary, nationalistic, God-fearing and strong development-oriented political leadership. We will raise a new brand of people-focused servant leadership to lead the country into the future.

# Model: Yangoru Saussia District

The blueprint for making our vision a reality is the transformation of the Yangoru Saussia District in East Sepik Province. Under the visionary and "action" leadership of Party Leader Hon. Richard Maru, Yangoru Saussia has been transformed from an under-developed rural District to a modern service centre and agricultural economic hub in just 10 years.

Today, the District is 100% connected by basic road infrastructure, produces vanilla, rice and 20% of Papua New Guinea's cocoa. Partnerships with the private sector in commercial agriculture and food production under the Sepik Fresh brand, investments in downstream processing of cocoa, stockfeed, dairy and renewal solar energy is in the pipeline.

The pioneering of the District School of Excellence concept to improve quality of education in rural PNG has proven to be a success. Investments in education, health, water & sanitation and markets for informal sectors have all proven to be very successful. People can now access banking and other services in the District.

Based on Yangoru Saussia's proven model, we can transform PNG and improve our socio-economic indicators by transforming one District a time. Together, we can make our vision a reality.
